Building Capacity for Tribal Research & Evaluation

Moderated by the NCAI Policy Research Center

Each year, the NCAI Policy Research Center (PRC) creates a space for its research and advocacy partners to share and coordinate information, data tools, and case studies to advance policy research in Indian Country. This year, both national and international perspectives on indigenous data governance and evaluation will be featured. In the afternoon, the PRC will highlight the results of the National Survey of Tribal Data Practices and share other insights learned from the "Using Science to Build Tribal Capacity for Data-Intensive Research" project, funded by the National Science Foundation.
